

National Summer Institute for Statistical & GIS Analysis of Crime & Justice Data

Statistics Guest Speaker:

Dr. Steven Wormith

University of Saskatchewan

Chair in
Forensic Psychology

GIS Guest Speaker:

Dr. Kim Rossmo

Texas State University

Developer of
"Geographic Profiling".

University Of Regina • Summer 2008

With the support of the Social Science and Humanities Research Council of Canada (SSHRC) and Statistics Canada, the University of Regina has developed an institute for the advanced training of participants in the statistical and geographical information systems (GIS) analysis of crime and justice data. (Co-sponsored by the Geography, Psychology, and Sociology departments)

The institute is open to approximately 50 participants from across the country, including academics, researchers, graduate students, and practitioners in the field (such as police, justice workers, etc.).

The National Summer Institute (NSI) is an intensive, hands-on workshop over seven days. Participants should have some background preparation in statistics, such as a university course. However, no background in GIS (mapping data) is required.

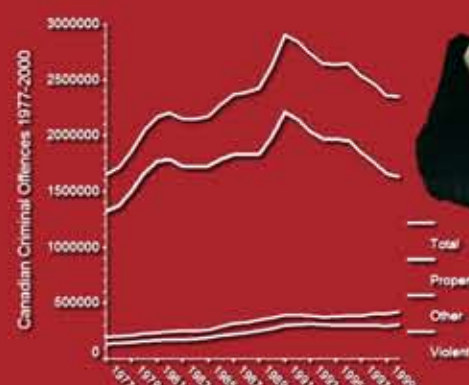

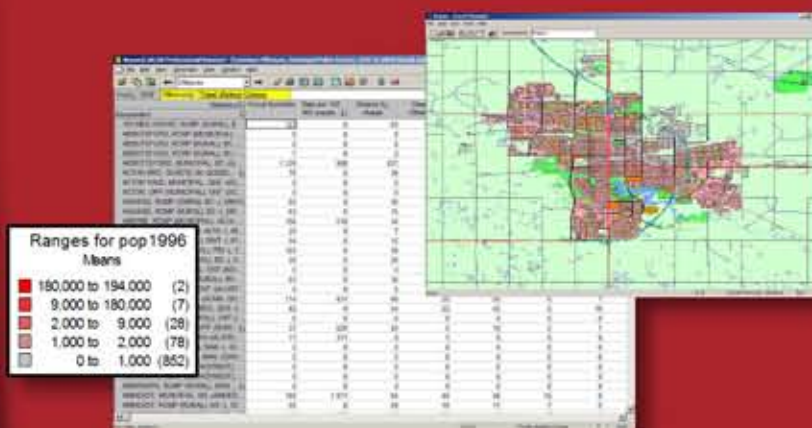

The only cost for the NSI is a non-refundable reservation fee of \$150 (\$75 for students). Funds are also available to help subsidize participants' travel and accommodations (based upon need).

The NSI is eligible for continuing education credit with the RCMP for its members (HRMIS code #00278).

In addition, inexpensive newly-constructed university housing is available to keep costs to a minimum (approximately \$47 per night).

The planned dates for the NSI this year are: June 22-28, 2008.
